I am a truck driver and 100% support XM radio. It is unsafe for me to drive and try to find a local radio station 4,5, or 6 times at 3AM during one trip. I listen to the radio for music NOT commercials. Even if I could get a local station as soon as a commercial comes on a change the station. I also can get INSTANT traffic and weather when I need and not every 15 or twenty minutes which is usually to late when I in a storm or traffic jam.
